

Business Insight

An M-Power Service

m-power solutions
Better information. Better decisions.

“The M-Power Business Insight provided an opportunity to review our business requirements, and assisted us to develop a plan that would meet these needs into the future.”

Helen Robinson, Senior Finance Coordinator,
KCGM

The M-Power Business Insight helps organisations get a deeper understanding of where they are now, where they want to be and how they can get there.

The focus of the Business Insight is totally dependent on your specific needs; we can focus on your complete Performance Management and Business Intelligence strategy or on particular areas of interest to you such as Software Selection for a proposed project or your Planning & Budgeting options.

Most importantly the Business Insight focuses on your organisations needs, we work with you to identify the achievements of your current environment whilst taking a realistic gauge of its effectiveness and set expectations for what could be achieved.

The Business Insight is led by our technical and functional experts but delivered in conjunction with your business and IT staff.

“KCGM identified a need to improve our processes in planning, budgeting and forecasting, but as we have some very complex requirements, we required some guidance around how we could implement systems that would improve the integrity of the output, whilst allowing flexibility for user input. The Business Insight provided an opportunity to review our business requirements, and assisted us to develop a plan that would meet these needs into the future.”

Helen Robinson, Senior Finance Coordinator, KCGM

Key Elements of the Insight Program

- Proven delivery methodology, delivered by some of the most experienced consultants in Australia
- Provides a clear insight into “where you are” and helps you to define “where you want to be” and provides plans on “how to get there” in the form of a phased road map
- Enables you to validate and prioritise business requirements
- Identifies returns and business benefits that are specific to your organisation
- Is generally software agnostic but can be used to help you make strategic decisions on software choices to support your plan

Business Insight Deliverables

The Business Insight Program provides a full report with associated documentation, it will include:

- Executive Summary – including overview of recommendations
- Introduction – explaining aims of Business Insight document
- Business Insight Review - list of people interviewed and documents reviewed
- Current Environment – section detailing the existing environment and associated issues such as inefficient workflows, poor data quality, etc...
- Required Environment – section reviewing aspirations, identifying the vision and mapping potential solutions to issues, including cost benefits associated with the new environment
- Phased Roadmap – high level project plan, resource plan and associated costs
- Product Shortlist – a list of potential products (this could be as short as one product or may not include any software element)
- Prioritised Actions – a section detailing the next steps that should be taken and how they would fit in to the proposed vision
